PU Outsole White `n Service

Due to the special anti slip profile of the abrasion-resistant, flexible and light polyurethane sole, liquid is drained and non-slip optimized.

IQ.CELL

The gel pad directly embedded in the heel area works just like a trampoline - it absorbs shock energy and returns it immediately as bounce.

PU Midsole

The direct injected lightweight PU midsole provides you with shock absorption across the whole tread.

FiberglassCap

The new developed high tech fiberglass toe cap for optimized protection and enhanced flexibility.

evercomfort White

This ergonomically shaped footbed provides a correct position and an optimum support to the foot. The perforation and the hydrophobic fabric cover improve and balance the foot climate, while a cushioning pad at the heel absorbs the impacts from outside.

Microfibre

No, it's not leather, but a hardwearing, easy-to-care microfiber material that is water- and irrepelling.
