Footbed: evercushion® pro  
Sole: TPU sole METRO PROTECT  
Sizes / Width: 39 - 47 / 11

DGUV  
112 - 191

## Rubber Outsole

The low-profile and therefore lightweight construction ensures great flexibility. The two-coloured TPU sole comes with an EVA cushioning pad in the heel area

## Upper

We use innovative materials to combine a superior comfort with the best performance.

## EVA Cushioning Pad

The EVA cushioning pad integrated in the heel area ensures optimum shock absorption during ground contact.

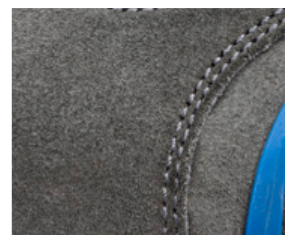

## Toe Cap Protection

The drawn up scuff cap avoids abrasion of the leather in the toe area when working on your knees.

## evercushion® PRO

The structure of this footbed gives you an optimum of cushioning from the first contact to the ground until the end of your move, giving relief to the compression zones. Its durable fabric cover and the perforated area at the forefoot ensure both breathability and comfort.

## BreathActive

The micro-channel system of this multi-layered lining provides you with a better breathability and moisture management when work means sweat.
